

VIKING PUMP

GENUINE PARTS

PARTS KITS

Order parts kits instead of individual components

Seal Kit

VS.

Partial Repair

=

Benefits of Kits:

- Everything you need before you open the pump
- Reduced frequency of repairs by doing a more complete repair
- Reduced downtime
- Increased uptime
- Reduced cost
- Extended service life
- Seal kits include seal lubricant and exploded diagram with parts list

Rebuild Kit

VS.

Partial Repair

=

Rebuild **vs.** Replace

- The decision to rebuild vs. replace involves cost of parts/labor vs. cost of a new pump. Our kits are designed to save time and money to make rebuilding easier and more cost effective.
- Viking pumps are designed and built to the highest standards for long life and to be rebuilt instead of replaced when applicable.
- Average of 35% savings to rebuild instead of replace.

Root Cause Analysis

- The most common reason for pump repair is leakage at the seal. This may be due to simple wear, but it may also be a symptom of other problems. It is vital to fully inspect all components.
- Viking Pump recommends rebuild kits to ensure extended pump life.

The Genuine Parts Advantage

Design

Only Viking Genuine Parts are specifically designed to meet performance requirements for Viking pumps.

Materials

Viking Genuine Parts are designed and tested to ensure optimum performance.

Support

Viking backs all Genuine Parts with its own warranty and distributor network.
